MAHAPHANT FIBRE CEMENT PUBLIC CO., LTD.

Doc Number : MFCP/1306/2008

13th June 2008

Subject : Certification of Shera products with non-asbestos content

Attention to : Whomever it may concern

Dear sir,

We are pleased to certify that all the products under brand 'SHERA', manufactured by Mahaphant Fiber Cement Public Company Limited, are *asbestos free* (ZERO Asbestos content).

All the products under SHERA brand are environment friendly green products and proud to be the first brand in Thailand to carry asbestos free products. These products are manufactured from Cellulose Fiber reinforced with Sand & Cement using autoclave technology.

Autoclave-curing technology is engineered to overcome physical vulnerabilities of the conventional air-cured, wood-or-fibre-reinforced cementitious materials such as shrinkage-and-warpage, stiffness-and-brittleness etc. The combined effect of the right composition of high quality cellulose fibres, appropriately bonded in the high-grade silicate matrix, treated under pressurized steam, provides all SHERA products with toughness and flexibility. These products can therefore withstand extra stresses caused by frequent exposures to wet environment.

SHERA consequently commands superior positioning for both exterior and interior decorations.

Please feel free to contact us for any query regarding Shera range of products. It will be our pleasure to assist you.

Yours Sincerely

Madee Sriwatthanah
